I am a Full Stack Developer, having experience primarily with JavaScript, React, Express, and MySQL. I have made a transition from textile design that have equipped me with skills that enable me to prioritise clean design, intuitive UX, and develop user focused solutions.

This career change allows me to showcase my strengths in creativity and resourcefulness. I consistently have overcome unforeseen challenges by setting aside biases and drawing from diverse sources of inspirations, leading to personal growth and sharpened intuition in difficult circumstancees. I excel at collaborating and utilizing the ideas of my team to achieve high-quality outcomes over personal priorities andd opinions. Now, I can apply these skills meaningfully and impactfully as I venture in this new path as a software engineer."

Skills

Javascript   React   MySql

HTML   CSS   Sass

Express   API Design   OAuth

Projects

ThriveVibe, Fullstack Developer
November - December 2023, London UK

- ThriveVibe is a platform designed to empower content creators on their journey by offering a unique combination of real-time feedback and connection opportunities.
- The platform features a Tinder-like swipe interface for voting on videos based on attached prompts.
- Users can leave detailed feedback through comments.
- All data, including results and comments, are accessible through clean graphs on the personal dashboard linked to uploaded videos.
- The Frontend is built using React, Node, Sass and Javascript. The backend is built using Node and Express.js and the database is implemented using MySql and Knex.js.

British Airways Collaboration, Frontend Developer
November 2023, London UK

- Collaborated with British Airways and a multidisciplinary team to address the challenge of encouraging customers to book flights using travel vouchers that were issued as compensation during Covid.
- I developed a proof of concept demonstrating how existing flight data could streamline the browsing process and reduce the number of clicks. I implemented a homepage banner promoting eVouchers that, when clicked, displays a pop-up for user information, offers instant verification, and suggests trips upon voucher confirmation.

FitTech, Fullstack Developer
Ongoing, London UK

- Currently developing a comprehensive website to support users in their weight loss journey.
- Users can create profiles (OAuth) to track essential data for weight loss, including personalised BMR and calorie calculators. The platform also offers a variety of targeted workouts based on users profile to enhance fat-burning progress.

Experience

Fashion Designer (Freelance), White Flower Dress

Cosmopolitan UK: Feature in published print issue (January 2022)

Dress was selected to be featured in the 50th Anniversary UK issue.

Pump Magazine: Front Cover and 10 page spread published print (July 2021)

Organized photoshoot with photographer and was picked as editor's choice for the magazine's monthly submission.

Selin Magazine: Front cover and feature in published print issue (July 2021)

Organized photoshoot with stylist that was submitted and featured by the magazine.

Design and Atelier Inter, Yuzefi
February - July 2022, London UK

- Created and colorized technical drawings using Adobe Illustrator and Photoshop for the RTW line. Developed 3D mockups and utilized CAD for accessories. Prepared sample orders and spec sheets to facilitate communication with factories.
- Provided the design team with visual research (silhouettes, details, manipulation, etc.).
- Copied and cut patterns during the development and production phases for both Ready to Wear and Accessories (i.e., bags).

Studio Intern, Jekeun
January - February 2022

- Developed and made colorized technical drawings with Adobe Illustrator and Photoshop.
- Copied patterns and carried out pattern cutting tasks.
- Completed tasks related to using the sewing and the heat press machine.

Education

Brainstation, Diploma in Software Engineering
September - July 2023, London UK

University of the Arts London, Bachelors in Textile Design
September 2019 - July 2023, London UK
